Deferred Maintenance, Renewal, Replacement, and Equipment FY2002 Request: \$1,352,000 Reference No: 31862

AP/AL: Appropriation Project Type: Deferred Maintenance

Category: Health/Safety

Location: Statewide Contact: Larry Streuber

**Election District**: Statewide **Contact Phone**: (907)465-1870

Estimated Project Dates: 07/01/2001 - 06/30/2006

### **Brief Summary and Statement of Need:**

Funds deferred maintenance at 35 state-owned buildings with a replacement value of \$224.3 million, along with selected leased facilities, including urgent immediate repair, renovation and equipment needs. Delay in funding will cause additional deterioration of the Department's facilities. Urgent repairs and deferred maintenance cannot be delayed continually without adversely affecting the State's investment in its facilities.

# Deferred Maintenance, Renewal, Replacement, and Equipment

This project funds deferred maintenance at Department of Health and Social Services (DHSS) facilities statewide, including immediate and critical renewal, repair, replacement and equipment needs. DHSS is responsible for 35 state-owned facilities with an estimated replacement value of \$224.3 million. The Department is also responsible for a limited amount of special repairs and upgrades not covered by lease agreements at more than 80 leased sites. The Department's facilities have ongoing as well as deferred maintenance needs resulting from heavy usage by staff and a variety of client groups. Funds will address these needs and maintain the state's investment in the Department's facilities.

FY2002 Request:

Reference No:

\$1,352,000

All facilities require regular maintenance, renewal, and repair to remain in good operational condition, and the state needs to protect its investment in capital facilities. Unfortunately, the Department has not had the financial resources to adequately maintain, repair, or renovate its facilities and the deferred maintenance backlog has continued to grow over the years. Eventually buildings deteriorate to such an extent that they must be replaced, usually at a cost greater than would have been required to pay for adequate maintenance, repair and renovation.

Funds requested for FY02 will cover the most urgent of DHSS's known immediate needs for deferred maintenance (less major deferred maintenance projects separately requested). These needs have been identified through a detailed building condition audit of all the Department's facilities, as shown in the list below. Estimates of needs for future years have been based on spreading the remainder of the deferred maintenance backlog over the following five year period. In addition to the existing backlog of deferred maintenance needs, new maintenance and repair needs will continue to arise. Therefore, for future years, a calculation of the amounts typically needed each year for repair, renewal and replacement for buildings such as those maintained by the Department has been added to known deferred maintenance needs. Delaying the minimal level of funds needed for urgent deferred maintenance will have a destructive impact on the State's investment in infrastucture and will lead to greater costs in the future.

Even as deferred maintenance needs are being taken care of, additional annual investment continues to be required to keep up with continuing repair or maintenance needs, or the deferred maintenance backlog will again continue the grow. The funding levels shown for the remainder of the six year period show how inadequate funding for ongoing maintenance will result in additional deferred maintenance needs. The funding level to keep up with repair, renewal and replacement needs (above and beyond ordinary day to day maintenance) was estimated by using standard formulas that are based on the cost of replacing a building. One formula assumes a constant proportion of annual maintenance costs over the life cycle and is derived as a percentage (1.5%) of building replacement costs; the other (the widely used Sherman-Dergis method) attributes greater costs to older buildings (= Replacement Cost x 0.75 x (Age of Building/1275)). The Alaska Psychiatric Hospital has not been included in these formula computations, because the Department will soon be replacing that facility.

Please note that the amounts requested for federal funds represent estimates of the federal funds that the department can earn through expenditures on these deferred maintenance projects. The actual amount of federal funds that can be earned will vary depending on individual projects and their consistency with federal program requirements.

The Department has recently completed a comprehensive and thorough series of building condition audits for all of its state-owned facilities. Those audits identified nearly \$8 million in urgent deferred maintenance, renewal, and replacement projects, for which the funds requested for this project can be used, as shown in the list below (which excludes projects included in other budget requests). Many of the projects represent immediate needs and are critical to maintaining the integrity of specific facilities. In addition, \$9.5 million in additional projects have been identified that, strictly speaking, may not be deferred maintenance projects but are needed for program efficiencies. In some cases replacement of facilities can be more cost effective than renovation and repair and can offer advantages in terms of program efficiencies. While based on a thorough and professional analysis of the condition of the Department's buildings, the list of projects is subject to change as items become more defined and as other needs become evident. Actual allocation of funds to particular projects will depend on a determination of current priority and emergency needs at the time that funds become available.

**IDENTIFIED DEFERRED MAINTENANCE PROJECTS** (Projects arranged in order of priority. Does not include Juneau Public Health Center Heating and Ventilation Upgrades, requested separately.)

#### **OTHER PROJECTS**

Other projects may not strictly speaking be deferred maintenance projects but are needed for program efficiencies. In some cases replacement of facilities can be more cost effective than renovation and repair and can offer advantages in terms of program efficiencies.

Kodiak Health Center (Griffin Building) Replace in lieu of repair Less amounts previously shown for Deferred Maintenance	\$1,236,000 -\$681,129
Johnson Youth Center Covered Recreational Yard	\$103,000
Juneau-Alaska Office Building Sprinkler System/Drop Ceiling	\$618,000
McLaughlin Youth Center Replace three cottages in lieu of renovation	\$8,203,950
